Mercury Theme Content Blocks Manual & Guide

WordPress Multisite Technical User Training Companion

Introduction

This document is a manual and guide on how to use the content blocks that accompany the new Mercury Theme for WordPress Multisite (WPMS) Technical Users. After you have finished the WPMS Technical User training, this guide will act as a reference to the blocks you will be using to create dynamic content on your webpage. This way, after completing the training, you will not be without a comprehensive, documented resource at your disposal.

**Please note that UFIT Web Services will not be offering support for the maintenance of and creation of content for the WPMS standalone websites you and your organization create.

Navigating WPMS Editor

Below are some general tips needed for navigating the WPMS editor environment as you add content blocks to your respective pages:

- Click the plus sign in the upper left corner to open the menu to search for or select a block. Another
 way to add a new block is to first deselect any block that you were originally working in, and then
 click into the main, blank part of the editor. Then click the black square with a white plus sign that
 shows up on the lower right side of the editor to reveal block options and a search box to search
 for more blocks.
- 2. The blocks are underneath the 'Theme' category with the block icon.
- 3. When adding URLs into the input field of a respective block, please make sure that the link you input is complete and includes the 'https://' protocol at the beginning.
- 4. To view or re-open the block content tree, better known as the Document Overview panel, click the button (three asymmetrical parallel lines or 'hamburger' menu icon) at the upper left corner of the editing page. The List View often referenced in this manual is a section inside of the Document Overview panel that appears when you click on the left tab titled 'List View.'
- 5. Once you are done adding your blocks and content to the page, click the 'Update' button at the top right corner to update the changes you made.

Onboarding

UFIT hosted WPMS is a web content management system. Access Request Roles are required. If you have not taken the WPMS Technical User Training, please visit this <u>link</u> to access video tutorials that demonstrate how to use the Mercury Theme's Content Blocks. If you are unfamiliar with the topics in the video tutorials and/or with WordPress in general, please click on this <u>link</u> to register for and complete the Getting Started with WordPress Multisite training.

Alert Block

There are two versions of the Alert Block: Global Alert and In-page Alert.

Global Alert

This is a Widget that applies to all pages when set up. Once implemented, it overrides all other alerts on individual pages. In order to set up the Global Alert follow these instructions:

1. Click on the Appearance tab in the Dashboard side menu to reveal a submenu that shows Widgets as an option. Then select Widgets.

Dashboard Home	WordPress 6.3 is ava	ilable! <u>Please update now</u> .
My Sites	Dashboard	
📌 Posts	There is an update av	ailable for Gravity Forms. <u>View Details</u>
🖨 Forms 🚺	Site Health Status	~ ¥ . •
PagesComments	0	Your site has critical issues that should T be addressed as soon as possible to improve its performance and security.
🔊 Appearance	Themes	Take a look at the 7 items on the Site
🖌 Plugins	Customize	<u>Health screen</u> .
💄 Users	Widgets	
差 Tools	Menus	~ ~ •
E Settings	🖈 56 Posts	22 Pages
 Collapse menu 	 2 Comments WordPress 6.2.2 runnin 	g ufl-unified theme. Update to 6.3

- 2. In the Widgets section, you will see 'Global Alert' as an item to edit.
- 3. Click the List View button (three parallel lines) at the upper left corner of the editor. This will show an outline of the available Widgets.

Widgets + ← ← =

Widgets > Global Alert > Alert		+ +	

- 4. Expand the Global Alert widget to view inner block content that needs to be added/edited. You will see that there is the Alert inner block.
- 5. Select the Alert inner block and you will see Block settings on the right side of the editor. These settings include a Heading and Description. Add your desired text in the available inputs.

- 6. The Alert inner block can be expanded to reveal inner blocks of its own. These are the Alert buttons that accompany the Alert Block.
- 7. Select one of the Alert Button inner blocks. On the right side of the editor, you will see that the block settings include inputs for Button Text, Destination (button URL), and a toggle button to turn on if you want the button's URL to open in a new tab.

- 8. If you would like to add another button, you can select the plus sign in a wide opaque, white rectangle at the base of the Global Alert widget. Add the content you would like to this new button.
- 9. If you would like to remove an Alert button, make sure to select the button you want to remove in the List View panel. Click the three small, vertical white dots that appear after your selection to reveal the options for the Alert Button inner block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Alert Button.' Select that option to remove the button you would like to delete.

10. Once you are finished adding content to the Global Alert widget, click the Update button at the upper right corner of the editor. Your updated Global Alert should appear all across every page of the website now.

In-page Alert

This is a content block that applies only to the page it is set up on. It doesn't affect any other alerts on other pages.

- 1. Add the Alert block to the editor page.
- 2. On the right side of the editor in the Block Settings panel, add appropriate text in the 'Heading' and 'Description' text fields.

3. Expand the Alert block to reveal an inner block: the Alert Button. Select the Alert Button to reveal its settings in the right-side block settings panel. Add the Button Text, Destination (button link/URL), and toggle on the 'Open in New Tab' button if you would like the button destination link to open in a

new tab.

4. In order to add another Alert button, click the opaque, white rectangle with a centered plus sign at the base of the Alert Block. Then add the appropriate content to the newly added Alert Button.

Wite title	Close

+	
Add Alert Button	

5. If you would like to remove an Alert Button, make sure to select the button you want to remove in the List View panel. Click the three small, vertical white dots that appear after your selection to reveal the options for the Alert Button inner block. A small menu appears with a list of options, and

at the bottom of that list is the option to 'Remove Alert Button.' Select that option to remove the button you would like to delete.

6. When you are finished, update the page to publish the content block.

Accordion Block

1. Add the Accordion block to the editor page.

- 2. On the left side, you will click on and add the main headline of the announcement.
- 3. On the right side, click on the subheading to add some brief details to support the main headline. You can also change the background color in the Block Settings panel to the right of the editor.
- 4. Then, if you would like to add buttons, click the plus sign in the long, white rectangle at the bottom of the announcement showcase container.

- 5. In the right side block settings pane you will see fields appear that allow you to add text and a hyper link to the buttons you add.
- 6. If you lose this pane, click the Document Overview button (three asymmetrical parallel lines) at the upper left section of the editing screen to view Announcements showcase block outline.
- 7. Expand the block to reveal the Announcements Showcase buttons subsection and use the Block settings panel on the right side to add text and hyperlinks to the button(s).
- 8. Toggle the 'Open in New Tab?' Option if you would like the button to open its link in a new tab.
- 9. To remove an Announcement Showcase Button, select the Announcement Showcase Button that you want to remove. Click the three small, vertical white dots that appear after your selection to reveal the options for the inner block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Announcement Showcase Button.' Select that option to remove the button you would like to delete.

Carousel block. Click the three small, vertical white dots that appear after your selection to reveal the options for the selected inner block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Content Carousel Slide.' Select that option to remove that inner block.

5. Once you have finished adding the appropriate amount of content for the Content Carousel block, update the page to publish it.

Content Carousel - Stack

1. Add the Content Carousel Stack block to the editor. Expand the Content Carousel Stack block in the List View of the Document Overview section in the left side panel to show the Stacked Slide

inner block in the editor.

- 2. Make sure the Stacked Slide inner block is selected to reveal the inner block's settings panel in the Block settings panel right side of the editor. You can upload an image, add a Slide Title, add Slide Text, and optionally add text to the Slide Button Label and Slide Button Link URL fields, respectively. You can also toggle on the 'Open in New Tab?' button to open the Slide Button Link URL in a new tab.
- 3. To add another slide, make sure that the Stacked Slide inner block is selected. Then click the plus sign in the wide rectangle at the base of the block. Add content to your newly added Stacked Slide.
- 4. If you need to remove a slide, select the Stacked Slide that you want to remove in the List View section of the Document Overview panel on the left side of the editor. Click the three small, vertical white dots that appear after your selection to reveal the options for the selected block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Stacked Slide.' Select that option to delete the selected slide.

5. Once you are finished adding slides and content, update the page to publish it to the page.

Event Shell

1. Add the Event Shell block to the editor. While the Event Shell block is selected in the List View, you will see that there is an option to add a Section Title. Add the appropriate text content to the Section Title input field.

Add Featured Card

5. To remove a Featured Card, in the Document Overview section on the left side of the editor, select the Featured Card inner block within the Featured Cards block that you want to remove. Click the three small, vertical white dots that appear after your selection to reveal the options for the selected Featured Card inner block. A small menu appears with a list of options, and at the bottom

of that list is the option to 'Remove Featured Card.' Select that option to remove that inner block.

6. Once you are finished adding the Featured Cards block content, update the page to publish it.

Featured Posts

- 1. Add the Featured Posts block to the editor.
- 2. In the List View of the Document Overview panel, expand the Featured Posts block to show its two inner blocks; Featured Posts Main and Supporting Featured Posts.

- 3. Select the Featured Posts Main inner block in the List View of the Document Overview panel. You will see that there are the following options; Upload Image, Featured Post Title, Featured Post Text On Hover, and Featured Post Link URL. There is also a slider button where you can toggle on the option to open the link you added in a new tab.
- 4. Once you have added content to the Featured Posts block, select the Supporting Featured Posts inner block and expand it. You will see two more inner blocks called Featured Posts Supporting. These inner blocks have similar options as the Featured Posts Main inner block, including an Upload Image button, and three input fields; Featured Post Title, Featured Post Text On Hover, and Featured Post Destination. There is also a slider button where you can toggle on the option to open the link you added in a new tab.

5. If you would like to add another Featured Posts Supporting inner block, select the Featured Posts Supporting inner block that you would want to add the new inner block after in the List View, and click the plus sign in a rectangle immediately below the inner block's content. Add content to the

 Featured Posts Featured Posts Main Supporting Featured Posts 	IFAS Harvests Pepp These peppers are being studied
Featured Posts Supporting	A CONTRACTOR OF THE OWNER
Featured Posts Supporting	The second s

Page > Featured Posts > Supporting Featured Posts > Featured Posts Supporting

newly added Featured Posts Supporting inner block.

6. To remove a Featured Posts Supporting inner block, navigate to the Document Overview section on the left side of the editor and select the Featured Posts Supporting inner block within the Supporting Featured Posts inner block. Click the three small, vertical white dots that appear after

your selection to reveal the options for the selected inner block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Featured Posts Supporting.' Select that option to remove that inner block.

7. Once you have finished adding the appropriate amount of content for the Featured Posts block, update the page to publish it.

Featured Video

- 1. Add the Featured Video Block to the editor. Make sure the Featured Video Block is selected in the List View of the Documents Overview panel on the left in order to show the block settings panel on the right.
- 2. For this block you can add the YouTube ID* in its corresponding input field and it will pull the thumbnail from the video as your Featured Video Image or optionally upload a related image. *example: if the URL of the video is: https://www.youtube.com/watch?v=aqz-KE-bpKQ. The ID is aqz-KE-bpKQ

- 3. Next, you can add content for the Title and the rest of the optional input fields: Description, Button Text, and Button Destination (URL). There is also an option to toggle the Open in New Tab button so that the Button Destination link can open in a new tab.
- 4. Once you are finished adding the Featured Video block's content, update the page to publish it.

Featured Video Multiple

1. Add the Featured Video – Multiple block to the editor. Add a title to the section with the "Write title..." placeholder.

- Expand the Featured Video Multiple block in the List View of the Document Overview section to show the Featured Video – Multiple Row inner block and select it. This should now reveal the Featured Video Item inner block (multiple videos items go in each row). Select it to show the Featured Video Item's content fields in the Block settings panel on the right.
- 3. For this block you can add the YouTube ID* in its corresponding input field and it will pull the thumbnail from the video as your Featured Video Item Image or optionally upload a related image. *example: if the URL of the video is: https://www.youtube.com/watch?v=aqz-KE-bpKQ. The ID is aqz-KE-bpKQ Then you can add content for the rest of the input fields: Video Title, and optional Video Text.

<section-header><section-header><text></text></section-header></section-header>	
+	
Load More	

4. To add another Featured Video Item, make sure the Featured Video Item you want to add another video after is selected. Then click the plus sign in a rectangle immediately below the inner block's content. Click the newly added Featured Video Item inner block to fill out the related content for it.

3. For the Full Width Text Block the main components include a Header, Intro Content, Content, and optional Classic Editor content. Add appropriate text content in each subsection of the block.

Enter header		
Enter Intro content		
Classic		

4. Once you are finished adding the Full Width Text Block's content, update the page to publish it.

Full Width Video/Image

1. Add the Full Width Video/Image block to the editor. Make sure the Full Width Video/Image block is selected in the List View of the Documents Overview panel on the left in order to show the block settings panel on the right.

UF 🛨 🖌 🕤 🖻		Switch to draft Preview Update

	Diay Video	
	Write title	
Page > Fullwidth Video / Img		Ŧ

- For this block you can add the YouTube ID* in its corresponding input field and it will pull the thumbnail from the video as your Featured Video Item Image or optionally upload a related image.
 *example: if the URL of the video is: https://www.youtube.com/watch?v=aqz-KE-bpKQ. The ID is aqz-KE-bpKQ
- 3. Next, you can add text to the Section Title field in the Full Width Video/Image block.
- 4. Once you are finished adding the Full Width Video/Image block's content, update the page to publish it.

Hero Block

1. Add the Hero Block to the editor. Make sure the Hero Block is selected in the List View of the Documents Overview panel on the left in order to show the block settings panel on the right.

2. At the top of the Block settings is the option to toggle on or off the split the hero option; meaning that instead of a full-width image or video, the right side of the block will have the image or video and the left side will have the text and CTA button. In the unsplit version of the Hero block, you can hover over the Hero Title to reveal the Hero Description text.

- Other options for the Hero Block include uploading an image or video, and adding the Hero Intro (optional), Hero Title, Hero Description, Button Text and Button Destination (URL) content. There is also an option to toggle the Open in New Tab button so that the Button Destination link can open in a new tab.
- 4. Once you are finished adding the Hero Block's content, update the page to publish it.

Image Gallery

1. Add the Image Gallery block to the editor. While the Image Gallery block is selected, there is an option to add optional heading text to the block via the Section Title and Section Subtext input fields.

2. Expand the Image Gallery block to show the Image Gallery Slide inner block. Then, expand the Image Gallery Slide inner block to reveal another inner block; Image Modal. Each Image Modal

Page > Image Gallery > Image Gallery Slide > Image Modal

gives the option to upload an image and add Slide Title. You also have the option to add more text content in the Classic Editor box.

3. You can add another Image Modal inner black by clicking the plus sign with the wide rectangular button at the base of the Image Gallery block. There is also another wide rectangular button under the previously mentioned one that will add another Image Gallery that will also have its own set of Image Modals.

Post Content Blocks

These blocks (Post Header, Post Content with Related, and Post Footer) are all used together to create a blog post or article on your WordPress site.

Post Header

1. Add the Post Header block to the editor.

UF 🛨 🖌 ५ ⇒ 🖻	51	witch to draft Preview Update	:
List View Outline X		Page Block	×
> 🗄 Blue Centered CTA		Post Header

Page) Port Header			

2. While this block is selected, you will see that there are two pieces of content to add. First you can upload an image and second you can add a post title. Add the image and post title of your choosing.

3. Once you are finished adding your chosen content, you can publish the page.

Post Content with Related

1. Add the Post Content with Related block to the editor. Expand this block to in the List View of the Document Overview panel to reveal two inner blocks; Post Content - with Related and Related Post Wrapper.

2. Select the Post Content – with Related inner block and expand it. You will see that there are 3 inner blocks available; two paragraphs and an image. For the image, you have options to change

the style from default to a more rounded shape, as well as alternative text, and image size and dimensions. Add the appropriate content to each of these inner blocks.

3. Next, Select the Related Post Wrapper inner block and expand it to reveal two inner blocks. Each of these inner blocks is supposed to showcase a Related Post. The Related Post inner block has a few options for adding content which includes uploading an image, Related Post Text and Related Post Link URL text input fields, and a slider button to toggle on if you would like the link to open in a new tab.

4. If you would like to add another Related Post, select the Related Post inner block that you would like to add the new inner block after in the List View, and click the white plus sign in a blue square in the upper left corner of the editor. Only one block should appear in the Block Inserter panel,

which is the Related Post inner block. Click on it to add it to the other Related Post inner blocks. Add content to the newly added Related Post inner block.

5. To remove a Related Post inner block, navigate to the Document Overview section on the left side of the editor and select the Related Post inner block within the Related Post Wrapper inner block. Click the three small, vertical white dots that appear after your selection to reveal the options for the selected inner block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Related Post.' Select that option to remove that inner block.

6. Once you have finished adding all of the content for this block, go ahead and publish it.

Post Footer Block

1. Add the Post Footer Block to the editor.

2. While the block is selected, you will see that there are a few pieces of content to add, which includes an Author Name, Author Email, and Author Phone. Add the relevant content to these input text fields.

Page > Post Footer Block

3. Once you have finished adding the appropriate content, publish the page to make the content live.

Showcase Text Image

- 1. Add the Showcase Text Image block to the editor.
- 2. Expand the Showcase Text Image block to reveal the Showcase Text Image Inner Block. This inner block gives the option to toggle the Media Placement, or which side (left or right) you would like the media (image) to appear on.

Page > Showcase Text Image > Showcase Text Image Inner Block

Page > Showcase Text Image > Showcase Text Image Inner Block

- 3. Next, you have the options to upload an image, add a Title, an optional Description, Link Text, Link Destination (URL), and a slider button to toggle on if you want to open the URL in a new tab.
- 4. Another Showcase Text Image Inner Block can be added by clicking the plus sign in a large rectangle immediately below the block's content.

5. If you would like to remove a Showcase Text Image Inner Block, navigate to the Document Overview section on the left side of the editor and select the Showcase Text Image Inner Block within the Showcase Text Image block. Click the three small, vertical white dots that appear after your selection to reveal the options for the selected Showcase Text Image Inner Block. A small menu appears with a list of options, and at the bottom of that list is the option to 'Remove Showcase Text Image Inner Block.' Select that option to remove that inner block.
